Fluctuations in chemical weathering on the Yangtze Block during the Ediacaran–Cambrian transition: Implications for paleoclimatic conditions and the marine carbon cycle

Lina Zhai, Chaodong Wu, Yuntao Ye, Shuichang Zhang, Yizhe Wang

PII: S0031-0182(17)30321-8
DOI: doi:[10.1016/j.palaeo.2017.11.006](https://doi.org/10.1016/j.palaeo.2017.11.006)
Reference: PALAEO 8508

To appear in: *Palaeogeography, Palaeoclimatology, Palaeoecology*

Received date: 22 March 2017
Revised date: 2 November 2017
Accepted date: 2 November 2017

Please cite this article as: Lina Zhai, Chaodong Wu, Yuntao Ye, Shuichang Zhang, Yizhe Wang , Fluctuations in chemical weathering on the Yangtze Block during the Ediacaran–Cambrian transition: Implications for paleoclimatic conditions and the marine carbon cycle. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Palaeo*(2017), doi:[10.1016/j.palaeo.2017.11.006](https://doi.org/10.1016/j.palaeo.2017.11.006)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
