Pepper mild mottle virus: A plant pathogen with a greater purpose in (waste)water treatment development and public health management

E.M. Symonds, Karena H. Nguyen, V.J. Harwood, M. Breitbart

PII: S0043-1354(18)30526-8

DOI: [10.1016/j.watres.2018.06.066](https://doi.org/10.1016/j.watres.2018.06.066)

Reference: WR 13893

To appear in: *Water Research*

Received Date: 11 May 2018

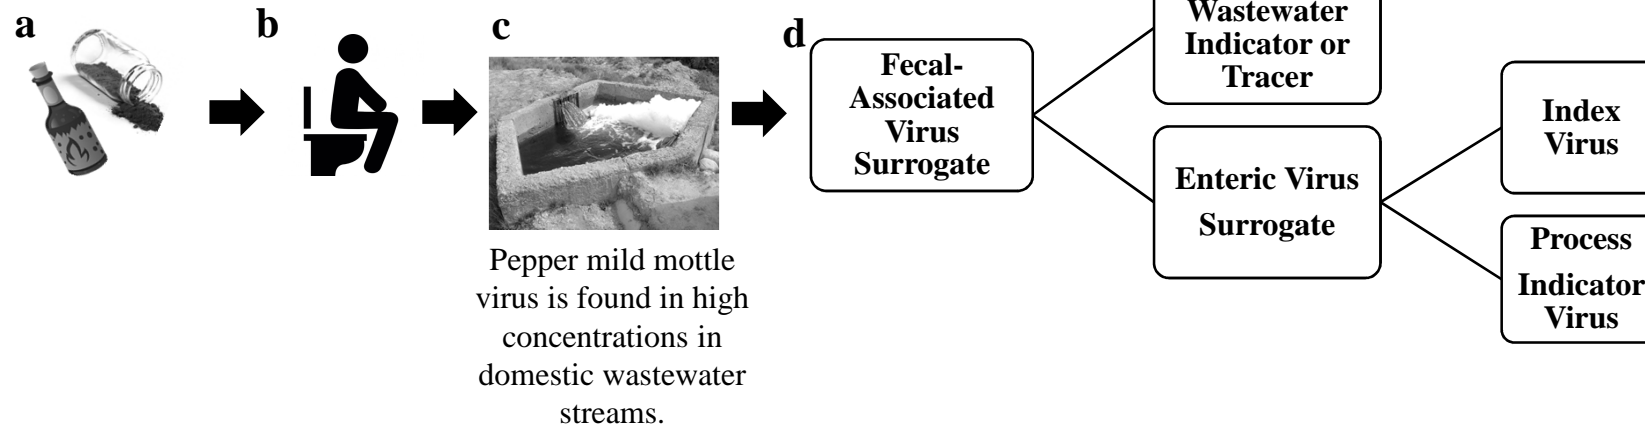

Revised Date: 26 June 2018

Accepted Date: 28 June 2018

Please cite this article as: Symonds, E.M., Nguyen, K.H., Harwood, V.J., Breitbart, M., Pepper mild mottle virus: A plant pathogen with a greater purpose in (waste)water treatment development and public health management, *Water Research* (2018), doi: 10.1016/j.watres.2018.06.066.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Pepper mild mottle virus is ingested in large quantities by people consuming processed pepper products. Subsequently, pepper mild mottle virus pass through the human digestive system.
