

# Accepted Manuscript

Neural networks for dimensionality reduction of fluorescence spectra and prediction of drinking water disinfection by-products

Nicolas M. Peleato, Raymond L. Legge, Robert C. Andrews

PII: S0043-1354(18)30159-3

DOI: [10.1016/j.watres.2018.02.052](https://doi.org/10.1016/j.watres.2018.02.052)

Reference: WR 13604

To appear in: *Water Research*

Received Date: 25 October 2017

Revised Date: 14 February 2018

Accepted Date: 20 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Fluorescence analysis by autoencoder

Improved disinfection  
by-product  
formation prediction
