Selenite reduction and ammoniacal nitrogen removal in an aerobic granular sludge sequencing batch reactor

Y.V. Nancharaiah, M. Sarvajith, P.N.L. Lens

PII: S0043-1354(17)31023-0

DOI: [10.1016/j.watres.2017.12.028](https://doi.org/10.1016/j.watres.2017.12.028)

Reference: WR 13426

To appear in: *Water Research*

Received Date: 14 August 2017

Revised Date: 12 December 2017

Accepted Date: 13 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Simultaneous COD, nitrogen and selenite removal by aerobic granular sludge
