

Accepted Manuscript

Effect of Rainfall Spatial Distribution and Duration on Rainfall Spatial Resolution for Surface Runoff Prediction Accuracy

Changhwan Kim, Dae-Hong Kim

PII: S1570-6443(17)30167-3
DOI: <https://doi.org/10.1016/j.jher.2018.04.001>
Reference: JHER 434

To appear in: *Journal of Hydro-environment Research*

Received Date: 3 May 2017
Revised Date: 13 November 2017
Accepted Date: 4 April 2018

Please cite this article as: C. Kim, D-H. Kim, Effect of Rainfall Spatial Distribution and Duration on Rainfall Spatial Resolution for Surface Runoff Prediction Accuracy, *Journal of Hydro-environment Research* (2018), doi: <https://doi.org/10.1016/j.jher.2018.04.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effect of Rainfall Spatial Distribution and Duration on Rainfall Spatial
Resolution for Surface Runoff Prediction Accuracy**

Submitted to
Journal of Hydro-Environment Research
