Analysis and prediction of ion channel inhibitors by using feature selection and Chou's general pseudo amino acid composition

Juan Mei , Yi Fu , Ji Zhao

PII: S0022-5193(18)30370-9
DOI: [10.1016/j.jtbi.2018.07.040](https://doi.org/10.1016/j.jtbi.2018.07.040)
Reference: YJTBI 9565

To appear in: *Journal of Theoretical Biology*

Received date: 13 May 2018
Revised date: 20 July 2018
Accepted date: 29 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The amino acid compositions of three groups of ion channel inhibitors were analyzed;
- The feature selection method was used to select the important features;
- The random forest was used to predict three groups of ion channel inhibitors.
