Maximum-likelihood estimation of xylem vessel length distributions

Roman M. Link , Bernhard Schuldt , Brendan Choat ,
Steven Jansen , Alexander R. Cobb

PII: S0022-5193(18)30367-9
DOI: [10.1016/j.jtbi.2018.07.036](https://doi.org/10.1016/j.jtbi.2018.07.036)
Reference: YJTBI 9561

To appear in: *Journal of Theoretical Biology*

Received date: 11 March 2017
Revised date: 26 July 2018
Accepted date: 27 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Mathematical equations for vessel length estimation from silicon injection data
- Analysis of overall and size-biased vessel length estimators in the literature
- Maximum-likelihood estimators for two different sampling schemes
- R scripts to easily estimate overall and size-biased vessel length distributions
