Modelling heterogeneity in viral-tumour dynamics: the effects of gene-attenuation on viral characteristics

Adrienne Jenner, Chae-Ok Yun, Arum Yoon, Peter S. Kim, Adelle C.F. Coster

PII: S0022-5193(18)30277-7  
DOI: [10.1016/j.jtbi.2018.05.030](https://doi.org/10.1016/j.jtbi.2018.05.030)  
Reference: YJTBI 9486

To appear in: *Journal of Theoretical Biology*

Received date: 18 December 2017  
Revised date: 25 May 2018  
Accepted date: 28 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A model for a oncolytic virus-tumour interaction allowing for heterogeneity
- Effective model representing experimental observations of the virus-tumour population
- Hierarchical parameter optimisation identifies processes affected by viral modifications
