

## Accepted Manuscript

Dynamics analysis of SIR epidemic model with correlation coefficients and clustering coefficient in networks

Juping Zhang, Chan Yang, Zhen Jin, Jia Li

PII: S0022-5193(18)30167-X  
DOI: [10.1016/j.jtbi.2018.04.007](https://doi.org/10.1016/j.jtbi.2018.04.007)  
Reference: YJTBI 9422

To appear in: *Journal of Theoretical Biology*

Received date: 3 November 2017  
Revised date: 2 April 2018  
Accepted date: 4 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

1. The SIR epidemic dynamic models with correlation coefficients are proposed.
2. The correlation coefficients between individuals are used as dynamic variables.
3. More complex dynamics are generated.
4. Two equivalent epidemic thresholds are given in the dynamic networks.
