Using High Resolution X-ray Computed Tomography to Create an Image Based Model of a Lymph Node

L.J. Cooper, B. Zeller-Plumhoff, G.F. Clough,
B. Ganapathisubramani, T. Roose

PII: S0022-5193(18)30189-9
DOI: [10.1016/j.jtbi.2018.04.021](https://doi.org/10.1016/j.jtbi.2018.04.021)
Reference: YJTBI 9436

To appear in: *Journal of Theoretical Biology*

Received date: 8 December 2017
Revised date: 21 March 2018
Accepted date: 15 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- High resolution X-ray computed tomography imaging of a murine lymph node
- Image based modelling of fluid flow pathways through a lymph node
- Permeability effects the fluid flow pathways and transport of material through node
