Microstructurally-based constitutive modelling of the skin – Linking intrinsic ageing to microstructural parameters

D. Pond, A.T. McBride, L.M. Davids, B.D. Reddy, G. Limbert

PII: S0022-5193(18)30022-5
DOI: [10.1016/j.jtbi.2018.01.014](https://doi.org/10.1016/j.jtbi.2018.01.014)
Reference: YJTBI 9327

To appear in: *Journal of Theoretical Biology*

Received date: 12 September 2017
Revised date: 21 December 2017
Accepted date: 15 January 2018

Limbert, Microstructurally-based constitutive modelling of the skin – Linking intrinsic ageing to microstructural parameters, *Journal of Theoretical Biology* (2018), doi: [10.1016/j.jtbi.2018.01.014](https://doi.org/10.1016/j.jtbi.2018.01.014)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A constitutive model for skin is proposed that links intrinsic ageing to parameter evolution.
- The model is motivated by mechanisms associated with microstructural evolution.
- The model captures both physical and geometric nonlinearities.
- The computational model is validated using published experimental data.
