iMem-2LSAAC: A Two-level Model for discrimination of Membrane Proteins And Their Types by extending the notion of SAAC into Chou's Pseudo Amino Acid Composition

Muhammad Arif , Maqsood Hayat , Zahoor Jan

PII: S0022-5193(18)30016-X
DOI: 10.1016/j.jtbi.2018.01.008
Reference: YJTBI 9321

To appear in: *Journal of Theoretical Biology*

Received date: 2 October 2017
Revised date: 23 December 2017
Accepted date: 10 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A two-tier intelligent automated predictor has been developed called iMem-2LSAAC for membrane proteins .
- Three feature extraction schemes are used.
- Various classification algorithms are utilized
- SVM with combination with SAAC achieved quite promising results.
