This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Proposing an Integrate-and-Fire model with refractory period and a retardation time.
- Giving synchronous conditions of cardiomyocytes in terms of refractory periods.
- Drawing phase diagrams of synchronization and harmonization with rich structures.
