This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- bicoid is a maternally transcribed gene which plays a pivotal role during the early developmental stage of *Drosophila melanogaster*.
- A new fundamental insights into gene cross-regulations of segmentation network is presented.
- An accurate mathematical model for bicoid signal extraction is proposed.
