

Accepted Manuscript

Visibility in the pure model of golden spiral phyllotaxis

Burghard Herrmann

PII: S0025-5564(17)30657-0
DOI: [10.1016/j.mbs.2018.05.003](https://doi.org/10.1016/j.mbs.2018.05.003)
Reference: MBS 8072

To appear in: *Mathematical Biosciences*

Received date: 12 December 2017
Revised date: 25 March 2018
Accepted date: 4 May 2018

Please cite this article as: Burghard Herrmann, Visibility in the pure model of golden spiral phyllotaxis, *Mathematical Biosciences* (2018), doi: [10.1016/j.mbs.2018.05.003](https://doi.org/10.1016/j.mbs.2018.05.003)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Definition of pure visibility as actually seen
- Pictures of 3-D model and 2-D representation
- Heuristic involving the reader
- Straightforward proof of a well-known observation
- Discussion of pure visibility vs. contact parastichies
- Overview of fascinating values of the pattern parameter
- High potential to be applicable to almost all models of spiral phyllotaxis
