This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Biotic aspects involved in the control of soilborne phytopathogens during composting of plant waste: the role of *Geobacillus thermodenitrificans* against damping-off producing agents

Authors: Sánchez San Fulgencio, N., Suárez-Estrella, F.*, López, M.J., Jurado, M.M., López-González, J.A., Moreno, J.

Address: Department of Biology and Geology, CITE II-B, University of Almería, Agrifood Campus of International Excellence, ceiA3, 04120, Almería (Spain).

Keywords: composting process, biological control, *damping-off*, plant growth promoting microorganisms, *Geobacillus thermodenitrificans*
