

## Accepted Manuscript

A  $\beta$ -carotene-amended artificial diet increases larval survival and be applicable in mass rearing of *Harmonia axyridis*

Yuan-Xing Sun, Ya-Nan Hao, Tong-Xian Liu

PII: S1049-9644(18)30256-1

DOI: <https://doi.org/10.1016/j.biocontrol.2018.04.010>

Reference: YBCON 3755

To appear in: *Biological Control*

Received Date: 20 March 2017

Revised Date: 16 March 2018

Accepted Date: 17 April 2018

Please cite this article as: Sun, Y-X., Hao, Y-N., Liu, T-X., A  $\beta$ -carotene-amended artificial diet increases larval survival and be applicable in mass rearing of *Harmonia axyridis*, *Biological Control* (2018), doi: <https://doi.org/10.1016/j.biocontrol.2018.04.010>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

For submission to: Biological Control
