16 contributions by authors of this manuscript)

17

18 Highlights:

- 19 - Wild and managed bees provide a variety of services for humans
20 besides pollination
- 21 - honey-, bumble-, orchard-, cucumber-, long-horn bees are crucial crop
22 pollinators
- 23 - stingless-, mining bees, and crop pollination in Asia, Africa are under-
24 studied
- 25 - further research is warranted for some services of bees
- 26 - e.g. propolis as a fire barrier, beeswax for preservation, nesting and
27 soil quality
