Modelling water dynamics in the rhizosphere

K.R. Daly, L.J. Cooper, N. Koebernick, J. Evaristo, S.D. Keyes, A. van Veelen, T. Roose

PII: S2452-2198(17)30092-7
DOI: <https://doi.org/10.1016/j.rhisph.2017.10.004>
Reference: RHISPH85

To appear in: *Rhizosphere*

Received date: 6 September 2017
Revised date: 19 October 2017
Accepted date: 19 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Modelling water dynamics in the rhizosphere

K.R. Daly¹§, L.J. Cooper¹, N. Koebernick¹, J. Evaristo², S.D. Keyes¹, A. van Veelen¹, and T. Roose¹

Acknowledgements

KRD, SDK, AvV and TR are funded by ERC Consolidator grant 646809 (Data Intensive Modelling of the Rhizosphere Processes). NK and LC are funded by BBSRC grant BB/L026058/1 (Rhizosphere by design: breeding to select root traits that physically manipulate soil). SDK is also supported by a University of Southampton New Frontiers Fellowship. JE is funded by the University of Nevada Reno Vice President of Research and Innovation. The authors acknowledge the use of the IRIDIS High Performance Computing Facility, and associated support services at the University of Southampton, in the completion of this work. The authors acknowledge the use of beam-time at the TOMCAT beamline of the Swiss Light Source (Paul Scherrer Institute, Villigen, Switzerland), and the assistance of Dr Goran Lovric in acquiring SRXCT data. Finally, the authors also acknowledge members of the 'Rooty Team' at University of Southampton for helpful discussions related to this work and the anonymous reviewers whose input has greatly improved this paper.
