This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Improving Puppy Behavior using a new Standardized Socialization Program

Helen Vaterlaws-Whiteside* and Amandine Hartmann

*Corresponding: Guide Dogs National Breeding Centre, Banbury Road, Bishops Tachbrook, Warwickshire, CV33 9WF, helen.whiteside@guidedogs.org.uk, +448453727432

Highlights

- A novel socialization program for puppies in the nest is presented and assessed
- Exposure to stimuli was tailored to mirror physiological and behavioral development
- The program was evaluated using six litters raised under standardized conditions
- Results demonstrated measurable, long-term effects on individual behavioral traits
- The program is recommended for working dog, pet dog breeders and shelters
