An efficient Bayesian data-worth analysis using a multilevel Monte Carlo method

Dan Lu, Daniel Ricciuto, Katherine Evans

PII: S0309-1708(17)31118-1
DOI: [10.1016/j.advwatres.2018.01.024](https://doi.org/10.1016/j.advwatres.2018.01.024)
Reference: ADWR 3080

To appear in: *Advances in Water Resources*

Received date: 30 November 2017
Revised date: 23 January 2018
Accepted date: 29 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Develop an efficient Bayesian data-worth analysis using a multilevel Monte Carlo method
- Apply the method to a subsurface flow model
- Evaluate and validate the effectiveness and efficiency of the proposed method
