This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Seafood is generally absent from food-water nexus studies
- This 'seafood gap' is increasingly problematic given growing global seafood demand
- We review water use concepts as they relate to seafood production
- We provide three cases to highlight water use concerns for aquaculture
- We outline future directions to integrate seafood into the broader food-water nexus
