No reef-associated gradient in the infaunal communities of Rapa Nui (Easter Island) –  
Are oceanic waves more important than reef predators?

Joao B. Gusmao, Matthew R. Lee, Ian MacDonald, Nicolas C. Ory, Javier Sellanes,  
Les Watling, Martin Thiel

PII: S0272-7714(18)30107-0

DOI: [10.1016/j.ecss.2018.06.019](https://doi.org/10.1016/j.ecss.2018.06.019)

Reference: YECSS 5895

To appear in: *Estuarine, Coastal and Shelf Science*

Received Date: 6 February 2018

Revised Date: 13 June 2018

Accepted Date: 16 June 2018

Please cite this article as: Gusmao, J.B., Lee, M.R., MacDonald, I., Ory, N.C., Sellanes, J., Watling, L., Thiel, M., No reef-associated gradient in the infaunal communities of Rapa Nui (Easter Island) – Are oceanic waves more important than reef predators?, *Estuarine, Coastal and Shelf Science* (2018), doi: 10.1016/j.ecss.2018.06.019.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
