Determining coral reef calcification and primary production using automated alkalinity, pH and $p\text{CO}_2$ measurements at high temporal resolution

Ashly McMahon, Isaac R. Santos, Kai G. Schulz, Tyler Cyronak, Damien T. Maher

PII: S0272-7714(17)30519-X

DOI: [10.1016/j.ecss.2018.04.041](https://doi.org/10.1016/j.ecss.2018.04.041)

Reference: YECSS 5845

To appear in: *Estuarine, Coastal and Shelf Science*

Received Date: 12 May 2017

Revised Date: 26 April 2018

Accepted Date: 30 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Determining coral reef calcification and primary production using automated alkalinity, pH and $p\text{CO}_2$ measurements at high temporal resolution
