Vertical accretion and carbon burial rates in subtropical seagrass meadows increased following anthropogenic pressure from European colonisation

Jimena Samper-Villarreal, Peter J. Mumby, Megan I. Saunders, Linda A. Barry, Atun Zawadzki, Henk Heijnis, Guia Morelli, Catherine E. Lovelock

PII: S0272-7714(16)30473-5

DOI: [10.1016/j.ecss.2017.12.006](https://doi.org/10.1016/j.ecss.2017.12.006)

Reference: YECSS 5701

To appear in: *Estuarine, Coastal and Shelf Science*

Received Date: 16 October 2016

Revised Date: 5 December 2017

Accepted Date: 15 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Vertical accretion and carbon burial rates in subtropical seagrass meadows**  
2 **increased following anthropogenic pressure from European colonisation**
