

## Accepted Manuscript

Effect of the pore water composition on the diffusive anion transport in argillaceous, low permeability sedimentary rocks

Cornelia Wigger, Luc Van Loon

PII: S0169-7722(17)30277-2  
DOI: doi:[10.1016/j.jconhyd.2018.05.001](https://doi.org/10.1016/j.jconhyd.2018.05.001)  
Reference: CONHYD 3391  
To appear in: *Journal of Contaminant Hydrology*  
Received date: 28 September 2017  
Revised date: 26 April 2018  
Accepted date: 5 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effect of the pore water composition on the diffusive anion transport in  
argillaceous, low permeability sedimentary rocks**
