When time affects space: Dispersal ability and extreme weather events determine metacommunity organization in marine sediments

Guilherme Nascimento Corte, Thiago Goncalves-Souza, Helio H. Checon, Eduardo Siegle, Ross A. Coleman, A. Cecília Z. Amaral

PII: S0141-1136(17)30721-3

DOI: [10.1016/j.marenvres.2018.02.009](https://doi.org/10.1016/j.marenvres.2018.02.009)

Reference: MERE 4458

To appear in: *Marine Environmental Research*

Received Date: 24 November 2017

Revised Date: 3 February 2018

Accepted Date: 11 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **When time affects space: dispersal ability and extreme weather events determine**
2 **metacommunity organization in marine sediments**
