The impact of artificial surfaces on marine bacterial and eukaryotic biofouling assemblages: A high-throughput sequencing analysis

Ulla von Ammon, Susanna A. Wood, Olivier Laroche, Anastasija Zaiko, Leigh Tait, Shane Lavery, Graeme Inglis, Xavier Pochon

PII: S0141-1136(17)30507-X

DOI: [10.1016/j.marenvres.2017.12.003](https://doi.org/10.1016/j.marenvres.2017.12.003)

Reference: MERE 4413

To appear in: *Marine Environmental Research*

Received Date: 1 September 2017

Revised Date: 9 November 2017

Accepted Date: 2 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 The impact of artificial surfaces on marine bacterial and eukaryotic biofouling
2 assemblages: a high-throughput sequencing analysis
