Title: CO₂ enrichment does not entirely ameliorate *Vachellia karroo* drought inhibition: a missing mechanism explaining savanna bush encroachment

Authors: Lloyd L. Nackley, Amy Betzelberger, Andrew Skowno, Adam G West, Brad S. Ripley, William J Bond, Guy F Midgley

PII: S0098-8472(18)30728-7
DOI: <https://doi.org/10.1016/j.envexpbot.2018.06.018>
Reference: EEB 3477

To appear in: *Environmental and Experimental Botany*

Received date: 5-12-2017
Revised date: 13-6-2018
Accepted date: 16-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title:

CO₂ enrichment does not entirely ameliorate *Vachellia karroo* drought inhibition: a missing mechanism explaining savanna bush encroachment.
