Elimination of *Salmonella enterica* on common stainless steel food contact surfaces using UV-C and atmospheric pressure plasma jet

Alonzo A. Gabriel, Ma Luisa P. Ballesteros, Leo Mendel D. Rosario, Roy B. Tumlos, Henry J. Ramos

PII: S0956-7135(17)30533-9

DOI: 10.1016/j.foodcont.2017.11.011

Reference: JFCO 5857

To appear in: *Food Control*

Please cite this article as: Alonzo A. Gabriel, Ma Luisa P. Ballesteros, Leo Mendel D. Rosario, Roy B. Tumlos, Henry J. Ramos, Elimination of *Salmonella enterica* on common stainless steel food contact surfaces using UV-C and atmospheric pressure plasma jet, *Food Control* (2017), doi: 10.1016/j.foodcont.2017.11.011

Highlights

1. Biphasic inactivation behavior was observed for *Salmonella* on UV-C-treated surfaces.
2. Log linear inactivation behavior was observed for *Salmonella* on plasma-treated surfaces.
3. Metal type and surface finish did not affect UV-C and plasma inactivation of *Salmonella*.
