The paradoxical effect of extra-virgin olive oil on oxidative phenomena during in vitro co-digestion with meat

Serena Martini, Martina Cavalchi, Angela Conte, Davide Tagliazucchi

PII: S0963-9969(18)30301-6
DOI: doi:[10.1016/j.foodres.2018.04.031](https://doi.org/10.1016/j.foodres.2018.04.031)
Reference: FRIN 7549
To appear in: *Food Research International*
Received date: 31 January 2018
Revised date: 26 March 2018
Accepted date: 14 April 2018

Please cite this article as: Serena Martini, Martina Cavalchi, Angela Conte, Davide Tagliazucchi , The paradoxical effect of extra-virgin olive oil on oxidative phenomena during in vitro co-digestion with meat. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Frin(2017), doi:[10.1016/j.foodres.2018.04.031](https://doi.org/10.1016/j.foodres.2018.04.031)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The paradoxical effect of extra-virgin olive oil on oxidative phenomena during *in vitro* co-digestion with meat

Serena Martini, Martina Cavalchi, Angela Conte, Davide Tagliazucchi*
