

## Accepted Manuscript

Interfacial activity and emulsifying behaviour of inclusion complexes between helical polysaccharides and flavouring molecules resulting from non-covalent interactions

Louise De Fenoyl, Déborah Hirel, Emile Perez, Sophie Lecomte, Estelle Morvan, Mathieu Delamplé

PII: S0963-9969(17)30834-7  
DOI: doi:[10.1016/j.foodres.2017.11.064](https://doi.org/10.1016/j.foodres.2017.11.064)  
Reference: FRIN 7186  
To appear in: *Food Research International*  
Received date: 4 September 2017  
Revised date: 23 November 2017  
Accepted date: 25 November 2017

Please cite this article as: Louise De Fenoyl, Déborah Hirel, Emile Perez, Sophie Lecomte, Estelle Morvan, Mathieu Delamplé , Interfacial activity and emulsifying behaviour of inclusion complexes between helical polysaccharides and flavouring molecules resulting from non-covalent interactions. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Food Research International* (2017), doi:[10.1016/j.foodres.2017.11.064](https://doi.org/10.1016/j.foodres.2017.11.064)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Interfacial activity and emulsifying behaviour of inclusion complexes between helical polysaccharides and flavouring molecules resulting from non-covalent interactions**
