

## Accepted Manuscript

Photocrosslinker technology: An antimicrobial efficacy of cinnamaldehyde cross-linked low-density polyethylene (Cin-C-LDPE) as a novel food wrapper

H.M. Manukumar, S. Umesha

PII: S0963-9969(17)30681-6  
DOI: doi:[10.1016/j.foodres.2017.09.095](https://doi.org/10.1016/j.foodres.2017.09.095)  
Reference: FRIN 7044  
To appear in: *Food Research International*  
Received date: 26 June 2017  
Revised date: 29 September 2017  
Accepted date: 29 September 2017

Please cite this article as: H.M. Manukumar, S. Umesha , Photocrosslinker technology: An antimicrobial efficacy of cinnamaldehyde cross-linked low-density polyethylene (Cin-C-LDPE) as a novel food wrapper. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Frin*(2017), doi:[10.1016/j.foodres.2017.09.095](https://doi.org/10.1016/j.foodres.2017.09.095)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
