The mathematical prediction model for the oxidative stability of vegetable oils by the main fatty acids composition and thermogravimetric analysis

Jinwei Li, Jian Liu, Xuyuan Sun, Yuanfa Liu

PII: S0023-6438(18)30417-1

DOI: [10.1016/j.lwt.2018.05.003](https://doi.org/10.1016/j.lwt.2018.05.003)

Reference: YFSTL 7113

To appear in: *LWT - Food Science and Technology*

Received Date: 30 January 2018

Revised Date: 19 April 2018

Accepted Date: 1 May 2018

Please cite this article as: Li, J., Liu, J., Sun, X., Liu, Y., The mathematical prediction model for the oxidative stability of vegetable oils by the main fatty acids composition and thermogravimetric analysis, *LWT - Food Science and Technology* (2018), doi: 10.1016/j.lwt.2018.05.003.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **The mathematical prediction model for the oxidative stability of vegetable oils by the main**
2 **fatty acids composition and thermogravimetric analysis**
