Optimization of supercritical carbon dioxide extraction of lutein and chlorophyll from spinach by-products using response surface methodology

Maëlle Derrien, Milad Aghabararnejad, André Gosselin, Yves Desjardins, Paul Angers, Yacine Boumghar

PII: S0023-6438(18)30231-7

DOI: [10.1016/j.lwt.2018.03.016](https://doi.org/10.1016/j.lwt.2018.03.016)

Reference: YFSTL 6945

To appear in: *LWT - Food Science and Technology*

Received Date: 1 August 2017

Revised Date: 6 March 2018

Accepted Date: 7 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Optimization of supercritical carbon
2 dioxide extraction of lutein and
3 chlorophyll from spinach by-products
4 using response surface methodology
