This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

22 Abstract

23 The ultra-high pressure homogenization (UHPH) effect on microbial and
24 physicochemical shelf life of cream during storage at 4 °C were studied and compared
25 with a conventional homogenization-pasteurization treatment. Cream samples were
