## **Accepted Manuscript**

Combined enzymatic and crossflow microfiltration process to assure the colloidal stability of beer

Alessio Cimini, Mauro Moresi

PII: S0023-6438(17)30887-3

DOI: 10.1016/j.lwt.2017.12.008

Reference: YFSTL 6697

To appear in: LWT - Food Science and Technology

Received Date: 18 October 2017
Revised Date: 2 December 2017
Accepted Date: 4 December 2017

Please cite this article as: Cimini, A., Moresi, M., Combined enzymatic and crossflow microfiltration process to assure the colloidal stability of beer, *LWT - Food Science and Technology* (2018), doi: 10.1016/j.lwt.2017.12.008.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## ACCEPTED MANUSCRIPT

- 1 LWT Food Science and Technology
- 2 Combined enzymatic and crossflow microfiltration process to assure the colloidal
- 3 stability of beer
- 4 Number of words 5511
- 5 Alessio Cimini, Mauro Moresi
- 6 Department for Innovation in the Biological, Agrofood and Forestry Systems,
- 7 University of Tuscia, Via S. C. de Lellis, 01100 Viterbo, Italy
