Regionalization study of maximum daily temperature based on grid data by an objective hybrid clustering approach

Yue Yu, Quanxi Shao, Zhaohui Lin

PII: S0022-1694(18)30512-2

DOI: <https://doi.org/10.1016/j.jhydrol.2018.07.007>

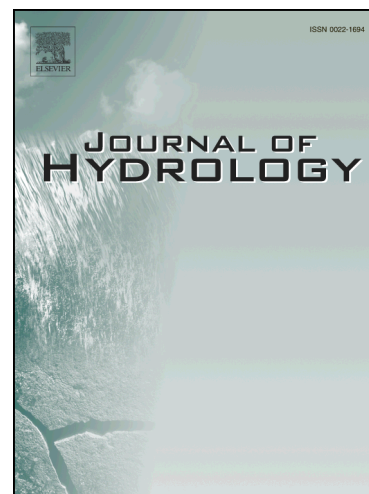

Reference: HYDROL 22939

To appear in: *Journal of Hydrology*

Received Date: 27 January 2018

Revised Date: 3 July 2018

Accepted Date: 4 July 2018

Please cite this article as: Yu, Y., Shao, Q., Lin, Z., Regionalization study of maximum daily temperature based on grid data by an objective hybrid clustering approach, *Journal of Hydrology* (2018), doi: <https://doi.org/10.1016/j.jhydrol.2018.07.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Regionalization study of maximum daily temperature based on grid
data by an objective hybrid clustering approach**
