Determining In-situ Unsaturated Soil Hydraulic Conductivity at a Fine Depth Scale with Heat Pulse and Water Potential Sensors

Zhengchao Tian, Dilia Kool, Tusheng Ren, Robert Horton, Joshua L. Heitman

PII: S0022-1694(18)30566-3

DOI: <https://doi.org/10.1016/j.jhydrol.2018.07.052>

Reference: HYDROL 22984

To appear in: *Journal of Hydrology*

Received Date: 27 April 2018

Revised Date: 6 July 2018

Accepted Date: 19 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Determining In-situ Unsaturated Soil Hydraulic Conductivity at a Fine Depth Scale with
Heat Pulse and Water Potential Sensors**
