The importance of volunteered geographic information for the validation of flood inundation models

E. Rollason, L.J. Bracken, R.J. Hardy, A.R.G. Large

PII: S0022-1694(18)30329-9  
DOI: <https://doi.org/10.1016/j.jhydrol.2018.05.002>  
Reference: HYDROL 22779

To appear in: *Journal of Hydrology*

Received Date: 30 November 2017  
Revised Date: 23 April 2018  
Accepted Date: 2 May 2018

Please cite this article as: Rollason, E., Bracken, L.J., Hardy, R.J., Large, A.R.G., The importance of volunteered geographic information for the validation of flood inundation models, *Journal of Hydrology* (2018), doi: <https://doi.org/10.1016/j.jhydrol.2018.05.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
