A new indicator framework for quantifying the intensity of the terrestrial water cycle

Thomas G. Huntington, Peter K. Weiskel, David M. Wolock, Gregory J. McCabe

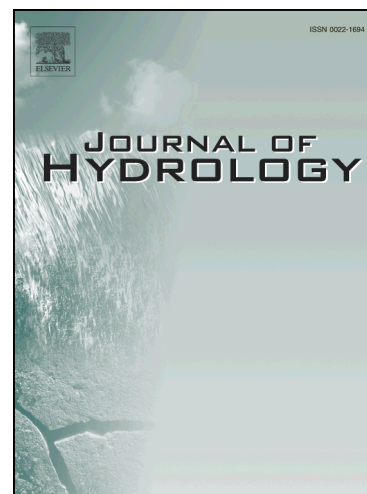

PII: S0022-1694(18)30127-6
DOI: <https://doi.org/10.1016/j.jhydrol.2018.02.048>
Reference: HYDROL 22597

To appear in: *Journal of Hydrology*

Received Date: 30 January 2017
Revised Date: 13 February 2018
Accepted Date: 14 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Huntington et al. "Water cycle intensity"

A new indicator framework for quantifying the intensity of the terrestrial water cycle

Thomas G. Huntington¹, Peter K. Weiskel², David M. Wolock³, and Gregory J. McCabe⁴
