An efficient soil water balance model based on hybrid numerical and statistical methods

Wei Mao, Jinzhong Yang, Yan Zhu, Ming Ye, Zhao Liu, Jingwei Wu

PII: S0022-1694(18)30156-2

DOI: <https://doi.org/10.1016/j.jhydrol.2018.02.074>

Reference: HYDROL 22623

To appear in: *Journal of Hydrology*

Received Date: 28 January 2018

Revised Date: 25 February 2018

Accepted Date: 26 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
