# Effect of ultrasonic stimulation on particle transport and fate over different lengths of porous media

Xingxin Chen, Zhonghan Wu, Qipeng Cai, Wei Cao

PII: S0022-1694(18)30180-X
DOI: https://doi.org/10.1016/j.jhydrol.2018.03.013
Reference: HYDROL 22646

To appear in: *Journal of Hydrology*

Received Date: 15 October 2017
Revised Date: 4 March 2018
Accepted Date: 5 March 2018

Please cite this article as: Chen, X., Wu, Z., Cai, Q., Cao, W., Effect of ultrasonic stimulation on particle transport and fate over different lengths of porous media, *Journal of Hydrology* (2018), doi: https://doi.org/10.1016/j.jhydrol.2018.03.013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
