Development of a methodology to assess future trends in low flows at the watershed scale using solely climate data

Étienne Foulon, Alain N. Rousseau, Patrick Gagnon

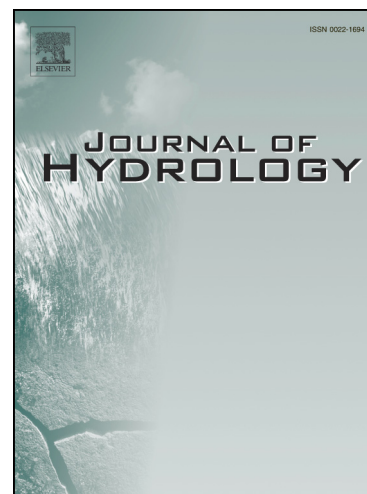

PII: S0022-1694(17)30892-2
DOI: <https://doi.org/10.1016/j.jhydrol.2017.12.064>
Reference: HYDROL 22475

To appear in: *Journal of Hydrology*

Received Date: 29 August 2017
Revised Date: 8 November 2017
Accepted Date: 24 December 2017

Please cite this article as: Foulon, E., Rousseau, A.N., Gagnon, P., Development of a methodology to assess future trends in low flows at the watershed scale using solely climate data, *Journal of Hydrology* (2017), doi: <https://doi.org/10.1016/j.jhydrol.2017.12.064>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**DEVELOPMENT OF A METHODOLOGY TO ASSESS
FUTURE TRENDS IN LOW FLOWS AT THE WATERSHED SCALE
USING SOLELY CLIMATE DATA**
