Evapotranspiration sensitivity to air temperature across a snow-influenced watershed: Space-for-time substitution versus integrated watershed modeling

S.M. Jepsen, T.C. Harmon, D.L. Ficklin, N.P. Molotch, B. Guan

PII: S0022-1694(17)30807-7
DOI: <https://doi.org/10.1016/j.jhydrol.2017.11.042>
Reference: HYDROL 22400

To appear in: *Journal of Hydrology*

Received Date: 10 June 2017
Revised Date: 15 October 2017
Accepted Date: 23 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evapotranspiration sensitivity to air temperature across a snow-influenced watershed:

Space-for-time substitution versus integrated watershed modeling

Jepsen, S.M.^{1,2*}, T.C. Harmon², D.L. Ficklin³, N.P. Molotch^{4,5}, B. Guan^{5,6}
