Remote sensing-based characterization of rainfall during atmospheric rivers over the central United States

Munir A. Nayak, Gabriele Villarini

PII: S0022-1694(16)30604-7

DOI: <http://dx.doi.org/10.1016/j.jhydrol.2016.09.039>

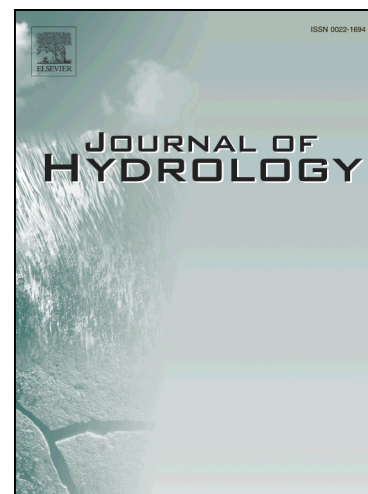

Reference: HYDROL 21535

To appear in: *Journal of Hydrology*

Received Date: 19 February 2016

Revised Date: 6 September 2016

Accepted Date: 14 September 2016

Please cite this article as: Nayak, M.A., Villarini, G., Remote sensing-based characterization of rainfall during atmospheric rivers over the central United States, *Journal of Hydrology* (2016), doi: <http://dx.doi.org/10.1016/j.jhydrol.2016.09.039>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Remote sensing-based characterization of rainfall during atmospheric
rivers over the central United States**
