Discussion

Accounting for sub-resolution pores in models of water and solute transport in soils based on computed tomography images: Are we there yet?

Philippe C. Baveye, Valérie Pot, Patricia Garnier

PII: S0022-1694(17)30686-8
DOI: <https://doi.org/10.1016/j.jhydrol.2017.10.021>
Reference: HYDROL 22301

To appear in: *Journal of Hydrology*

Received Date: 15 November 2016
Revised Date: 24 June 2017
Accepted Date: 9 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
