A review of radioactive isotopes and other residence time tracers in understanding groundwater recharge: possibilities, challenges, and limitations

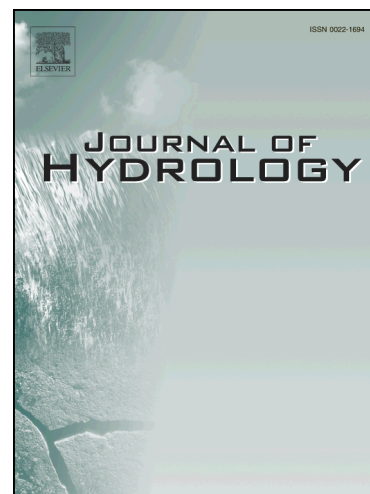

Ian Cartwright, Dioni Cendon, Matthew Currell, Karina Meredith

PII: S0022-1694(17)30729-1

DOI: <https://doi.org/10.1016/j.jhydrol.2017.10.053>

Reference: HYDROL 22333

To appear in: *Journal of Hydrology*

Please cite this article as: Cartwright, I., Cendon, D., Currell, M., Meredith, K., A review of radioactive isotopes and other residence time tracers in understanding groundwater recharge: possibilities, challenges, and limitations, *Journal of Hydrology* (2017), doi: <https://doi.org/10.1016/j.jhydrol.2017.10.053>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A review of radioactive isotopes and other residence time tracers in understanding groundwater recharge: possibilities, challenges, and limitations
