The influence of temperature and moisture content on sandstone thermal conductivity from a case using the artificial ground freezing(AGF) method

Shen Yanjun, Wang Yongzhi, Zhao Xiaodong, Yang Gengshe, Jia Hailiang, Rong Tenglong

PII: S0165-232X(18)30039-9
DOI: doi:[10.1016/j.coldregions.2018.08.004](https://doi.org/10.1016/j.coldregions.2018.08.004)
Reference: COLTEC 2633
To appear in: *Cold Regions Science and Technology*
Received date: 24 January 2018
Revised date: 19 July 2018
Accepted date: 7 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Influence of Temperature and Moisture Content on Sandstone Thermal Conductivity from a Case Using the Artificial Ground Freezing(AGF) Method
