An effective way to estimate the Poisson's ratio of silty clay in seasonal frozen regions

Shufeng Chen, Lingwei Kong, Guofang Xu

PII: S0165-232X(17)30517-7
DOI: [doi:10.1016/j.coldregions.2018.06.003](https://doi.org/10.1016/j.coldregions.2018.06.003)
Reference: COLTEC 2601
To appear in: *Cold Regions Science and Technology*
Received date: 7 November 2017
Revised date: 2 June 2018
Accepted date: 8 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**An effective way to estimate the Poisson's ratio of silty clay in seasonal frozen
